

155 Mt CO₂e - Total Carbon Edmonton can
emit before exceeding a 1.5C⁰ budget

+

NO path to a decent future
for our children without
industrial scale, deep energy
retrofits to existing buildings

Deep Energy Retrofits reduce building energy requirements so much that the remainder can be obtained from zero emission sources.

Incremental Retrofits

Half measures can lock in the remaining emissions for generations and may well prevent them from ever being zero carbon ready.

Ritchie Deep Energy Retrofit
