Notes:

* Where the vision, goals and objectives of an ASP reflect the context of a particular area, some land uses may not be entirely necessary or desirable. Calculations for Neighbourhoods reflect a general framework for future development and are estimates. Detailed calculations will be prepared during the NSP approval stage. Applicants are advised to consult with the Planning and Development Department for up-to-date housing mix guidelines, unit and population factors, and School Boards specifically regarding school need and student generation factors. Residential land use is generally depicted on the Land Use Concept map.

**The total area of this designation is 1.2 ha. The assumed split between residential and non-residential (retail and office) land uses is assumed 70:30 respectively. The residential portion of this designation is accounted for in Medium Density Residential.
