

Yes to a Private Tree Preservation Bylaw

Edmonton River Valley Conservation Coalition

- “Edmonton’s trees represent an irreplaceable asset.”
- “Unlike other municipal infrastructure, trees increase in value over time.”
- “The urban forest...makes a quantifiable contribution to the long-term livability of our city.”

Trees...

- mitigate climate change
- clean the air
- cool the city
- help prevent drought and flooding
- provide food and habitat for wildlife
- contribute to our physical and mental health
- beautify our city

We can't afford *not* to protect them.

Trees & Urban Forestry

Urban Tree Canopy Expansion

Urban Tree Canopy Expansion

This project is part of the City's commitment to climate change resilience, as we plant 2 million new trees by 2050.

Grist

Leaving trees alone might be better than planting new ones

Newer isn't always better -- at least, not when it comes to sequestering carbon.

Trees in Toronto

Request the pruning or removal of a City tree.

Create a Service
Request

Trees work hard. They absorb water, clean the air, provide shade, reduce erosion, flooding and wind tunnels, and decrease heating and cooling costs. Maintenance is important for the health of trees. Learn about managing trees on your property and how to get a [Permit to Injure or Remove Trees](#).

Edmontonians support a private tree bylaw

3. How much do you agree or disagree that the City should pass bylaws to protect trees on private property?

A small majority of respondents agree that the City should pass bylaws to protect trees on private property.

Tree preservation bylaw...

- Requires a permit for cutting
 - Forces a pause and awareness
 - Ensures monetary value for trees
 - Creates a standard of tree preservation
 - Enables public education
 - Requires 2:1 or 3:1 replacement
 - All the above = incentive to preserve trees
 - Permit can cover enforcement
-

“The truth is that high urban density and abundant housing are entirely compatible with a lush tree canopy. And not just with creating one from scratch. We can and should retain existing trees that are valuable in terms of the ecosystem services they provide: shade, beauty, clean air, erosion control, birdsong.”

There is Unrest in the Urban Forest

Daniel Herriges · January 12, 2022

The live oak by the author's house. There was no good angle to capture its sheer scale, but rest assured—it's enormous. (Source: Author.)
