

Status of Plans in Effect

The City Planning Framework (the Framework) initiated an intentional process for Administration to streamline the plan and policy landscape in Edmonton and minimize policy conflicts with The City Plan. Through phase one of the Framework's implementation, 75 plans were repealed. The District Planning project proposes to repeal an additional 46 plans and reflect any necessary policy and mapping direction from these in the district plans themselves. Together, this will result in over 121 plans being repealed since the implementation of The City Plan, or approximately 58 per cent of all plans in effect.

Over time, it is expected that other plans in effect will serve out their purpose and be repealed through the City Planning Framework, resulting in a further streamlined plan and policy landscape.

Reduction in Area Plans in Effect Over Time

*Note: Proposed area plan repeals are subject to change. Revisions will be shared publicly in March 2023 and debated at Public Hearing in August 2023.
