**Update on Environmental
Planning, Communication and
Reporting**

Edmonton

Edmonton's Climate Is Changing

Edmonton's Average Annual Temperature: 1880 - 2022

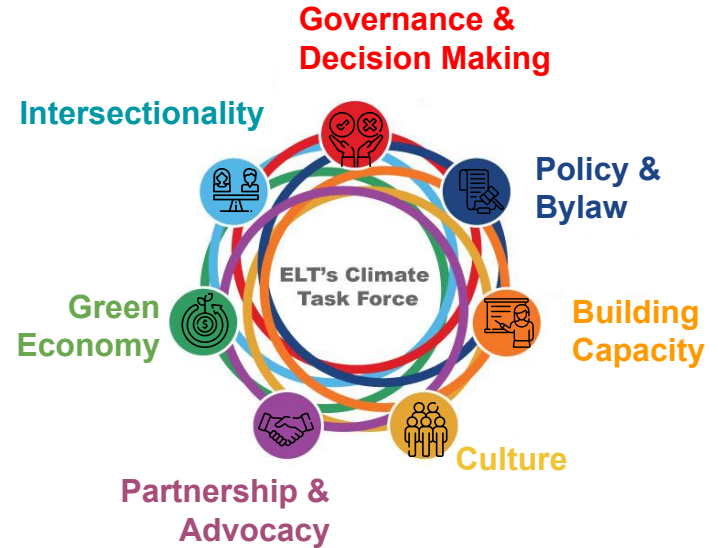

Background

Decisions made today will set the course for Edmonton's future climate resilience.

Requires: new ways of working; environment and climate embedded into projects and planning; more environment and climate information; and new decision-making processes.

Progress To Date

- Chief Climate Officer
- ELT Climate Task Force
- Environment and Climate Review in Council Reports

Environment & Climate Review: What We Are Hearing

- Screening is working
- Expanded review could be simplified with key points included in the report body
- Timing - considerations are needed at project initiation

Next Steps

Continue:

- Reviewing organization structure
- ELT Climate Task Force Efforts
- Developing new process for project initiation
- Expanding Environment and Climate Reviews in Council Reports

Questions and Thank You
