*This District Plan and its contents are for informational purposes only. It is a **draft proposal, subject to change**, and is in no way binding upon any lands within the municipal corporate boundaries of the City of Edmonton. The City of Edmonton provides this information in good faith, but it gives no warranty nor accepts liability from any incorrect, incomplete or misleading information or its use for any purpose.*

Land Acknowledgement

The lands on which Edmonton sits and the North Saskatchewan River that runs through it have been the sites of natural abundance, ceremony and culture, travel and rest, relationship building, making and trading for Indigenous peoples since time immemorial.

Edmonton is located within Treaty 6 Territory and within the Métis homelands and Métis Nation of Alberta Region 4. We acknowledge this land as the traditional territories of many First Nations such as the Nehiyaw (Cree), Denesuliné (Dene), Nakota Sioux (Stoney), Anishinaabe (Saulteaux) and Niitsitapi (Blackfoot).

Where Edmonton has been a gathering place for Indigenous Peoples for thousands of years, iyiniw iskwewak wihtwawin (the committee of Indigenous matriarchs) have gifted traditional names to the City of Edmonton's naming committee to honour these sacred places in Edmonton and to preserve the history for future generations. The Horse Hill district is located within the Edmonton ward named Dene.

Dene (Pronunciation: DEH-NEH). Dene originates from the Dene language. The word Dene refers to the various tribes and people, Indigenous and non-Indigenous, that settled along the North Saskatchewan River and who live there now. Many Dene tribes settled along the shores of the river, including the area where Edmonton now sits.

The City of Edmonton owes its strength and vibrancy to these lands and the diverse Indigenous peoples whose ancestors' footsteps have marked this territory as well as settlers from around the world who continue to be welcomed here and call Edmonton home.

Together, we call upon all our collective honoured traditions and spirits to work in building a great city for today and future generations.

1 Introduction to District Plans

A district is a collection of neighbourhoods that ideally contain most of the services and amenities Edmontonians need to meet their daily needs and live more locally. Edmonton has 15 districts, each with a unique district plan created to reflect the residential and non-residential opportunities the area contains and its location within the city. These district plans are principal policy documents that guide the physical change of each district as described in [The City Plan](#), with a focus on planning and design, mobility and growth management systems.

The City Plan looks into the future and sets the direction for how Edmonton will grow and change as it approaches a city of two million people. One way it plans for this growth is through the network of districts, which will help achieve one of The City Plan's Big City Moves - a "Community of Communities". Big City Moves are bold, transformative priorities necessary for change. District plans provide direction on how each district will grow to improve the connection, accessibility and quality of life at a local level and throughout the city.

While The City Plan guides the city's growth to two million residents, district plans provide direction for The City Plan's first population horizon of 1.25 million Edmontonians.

District plans play a key role in bringing the "Community of Communities" vision to life by laying the foundation for 15-minute communities. This concept will help direct services and amenities closer to where people live so Edmontonians can meet most of their daily needs within a 15-minute walk, roll, bicycle ride or transit trip from their home.

Districts should not be considered perfectly self-contained. Each district contains unique destinations with diverse commercial, recreational and employment activities. People living or working near the edge of one district may be best served by amenities in an adjacent district for their 15-minute needs.

There are 16 district plan bylaws:

- **District Policy** - applies to all districts and provides citywide policy direction.
- **15 district plans** - describe the districts, provide their specific policies and explain how they will change over time.

District plans and the [District Policy](#) will be used to guide change toward [The City Plan](#) vision and provide policy direction to accommodate Edmonton's growth up to the 1.25 million people milestone.

Together, these documents will inform city-building decisions by civic administration, businesses, civil societies and residents. They build on the guidance contained in existing policies and guidelines to promote sound planning, fiscal responsibility and equity across all parts of Edmonton.

District plans will respond over time to accommodate Edmonton's growing population, the shifting municipal environment and emerging priorities. More detailed information may be added to the District Policy or individual district plans as additional planning work is completed or the context changes. District plans are designed to be dynamic rather than static - living documents that are kept up to date to ensure ongoing usefulness and relevance. The City intends to undertake major amendments to update district plans when the City's population approaches 1.25 million.

1.1 How to Use This District Plan

This district plan and the [District Policy](#) must be read together for complete planning direction. The District Policy provides policy direction for all districts and includes a glossary of terms and map features found in both this district plan and the District Policy. This district plan provides detailed information on where and how the District Policy applies through maps showing features and planned geographies, as well as additional and exceptional area-specific policies.

The steps below outline how to use this district plan and District Policy:

Step 1: Read Introduction to District Plans ([Section 1](#))

Section 1: Introduction to District Plans explains the authority and relationship between district plans, the District Policy and other planning documents and plans.

Step 2: Review the District Context ([Section 2](#))

Section 2: District Context describes and shows where the district is located within the city, how the district came to be and what is located within the district at the time of district plan adoption.

- [Map 1: Citywide Context](#)
- [Map 2: Heritage and Culture](#)
- [Map 3: District Context – Assets](#)
- [Map 4: District Context – Development Considerations](#)

Step 3: Review the planning direction for the district ([Section 3](#))

Section 3: District Systems and Networks describes and shows the district's planned systems and networks including land use, nodes and corridors, open space and natural areas, mobility, and managing growth and the investments planned for these networks as Edmonton reaches 1.25 million people.

- [Map 5: Managing Growth to 1.25 Million](#)
- [Map 6: Land Use Concept to 1.25 Million](#)
- [Map 7: Nodes and Corridors](#)
- [Map 8: Open Space and Natural Areas to 1.25 Million](#)
- [Map 9: Active Transportation to 1.25 Million](#)
- [Map 10: Transit to 1.25 Million](#)

[Section 5: 'Growth to 2 Million'](#) summarizes how the district will continue to grow and change beyond the 1.25 million population horizon.
[Map 12: Vision at 2 Million](#)

Step 4: Review the Area-Specific Policy ([Section 4](#))

Determine if there are any area-specific policies or geographic plans that apply to smaller areas within the district. [Map 11: Area-Specific Policy Subareas](#) indicates areas where the area-specific policy applies. These policies are unique to the district and may be additional or exceptional to the District Policy.

Step 5: Consult the [District Policy](#)

Consult the [District Policy](#) to find the applicable policies using the district maps and area-specific policy information identified through Steps 2 to 4 above.

All district plan map symbols, locations, features and boundaries shall be interpreted as approximate unless otherwise specified within the plan. If interpretation varies, consult the District Policy for further direction. Mass transit networks and other infrastructure works are subject to further technical study and refinement.

Policies in the District Policy are positive and non-exclusive statements of intention, and therefore do not exclude actions they do not describe. For example, a policy to support a certain type of development does not prevent the City from supporting a different type as well.

District plans must be read in conjunction with [The City Plan](#) and other policies, strategies and guidelines established by the City. References to applicable strategies and guidelines are included but are not comprehensive. For a complete review of applicable City policies and guidelines regarding individual development proposals or projects, consult with city planning staff.

1.2 Authority and Relationship to Other Plans

District plans and the [District Policy](#) are additional statutory plans, as described under Section 635.1 of the Municipal Government Act, as amended by the City of Edmonton Charter 2018 Regulation, and have been prepared in accordance with Section 636 of the Municipal Government Act.

District plans are subject to the City of Edmonton's Municipal Development Plan ([The City Plan](#)); in the event of a discrepancy, The City Plan shall prevail over the district plans and District Policy. In the event of a conflict between [Table 2: Area-Specific Policy](#) and the District Policy, **Table 2** shall prevail.

Where there are existing statutory plans (Area Structure Plans, Area Redevelopment Plans, or other local plans) other than the City Plan, the district plan will guide plan amendment decisions only, and the existing statutory plan will guide rezoning, subdivision and development permit decisions. Where no other statutory plan other than the City Plan is in effect for a given area, district plans and the District Policy will guide rezoning, subdivision, and development permit decisions. The creation of new statutory plans will be guided by the District Policy and the pertinent district plans in effect. Where there are Area Structure Plans and Area Redevelopment Plans in effect, the planned density targets established in those plans will be maintained to ensure consistency with the [Edmonton Metropolitan Region Growth Plan](#).

District plans support the Edmonton Metropolitan Region Board's growth objectives and strengthen collaboration with regional partners. Area Structure Plans (ASPs), Neighbourhood Structure Plans (NSPs) and other geographic

plans will continue to provide guidance to ensure the orderly first-generation development of Developing Areas and Future Growth Areas.

1.3 Relationship With the Zoning Bylaw

District plans, the District Policy and other applicable statutory plans, guidelines and policy direction will inform and guide discretion in decision-making when considering land use, urban design and general planning decisions made while using Edmonton's Zoning Bylaw ([Bylaw XXXXX](#)).

City Council may designate an area as a Direct Control Zone in accordance with Section 641 of the Municipal Government Act. Direct Control Zones that were approved prior to [\[DATE OF PASSAGE OF DISTRICT POLICY\]](#), shall not be subject to the District Policy and applicable district plan. Any Direct Control Zones approved following this date will be subject to, and must align with, the District Policy and the applicable district plan.

1.4 Amendments

Amendments to district plans may be proposed from time to time to reflect system or network updates, such as changes to land use, mobility systems, heritage resources, growth activation priorities or the repeal of statutory plans. Amendments to specific areas of a district plan may be undertaken to provide additional policy direction as required. Where changes are required to accommodate a land development application, the applicant will be required to prepare the plan amendments in support of the application. Such amendments shall align with the general intent of policies outlined in the District Policy and The City Plan. All amendments to the plan must be presented as a proposed bylaw to City Council for consideration at a public hearing.

2 District Context

2.1 Physical Context

The Horse Hill District is located in the northeast area of the city and is one of 15 districts in Edmonton's District Network as outlined in [The City Plan](#). Neighbouring municipalities include Fort Saskatchewan to the northeast and Strathcona County to the southeast; Sturgeon County surrounds the district on its west, north and northeast edges. Nearby districts include the Northeast District to the south. Horse Hill District includes all lands depicted in [Map 1: Citywide Context](#), including the following neighbourhoods:

- Edmonton Energy and Technology Park
- Evergreen
- Marquis
- Rural North East Horse Hill
- Rural North East South Sturgeon

The Horse Hill District is generally bordered by 259 Avenue NW / Highway 37 to the north, the North Saskatchewan River and 33 Street NE to the east, Anthony Henday Drive to the south and the Canadian Forces Base (CFB) Edmonton and 66 Street NW to the west. The roadways connect and support the movement of

people and goods traveling south to the Northeast District and beyond, and to nearby municipalities such as Fort Saskatchewan, Sherwood Park and St. Albert.

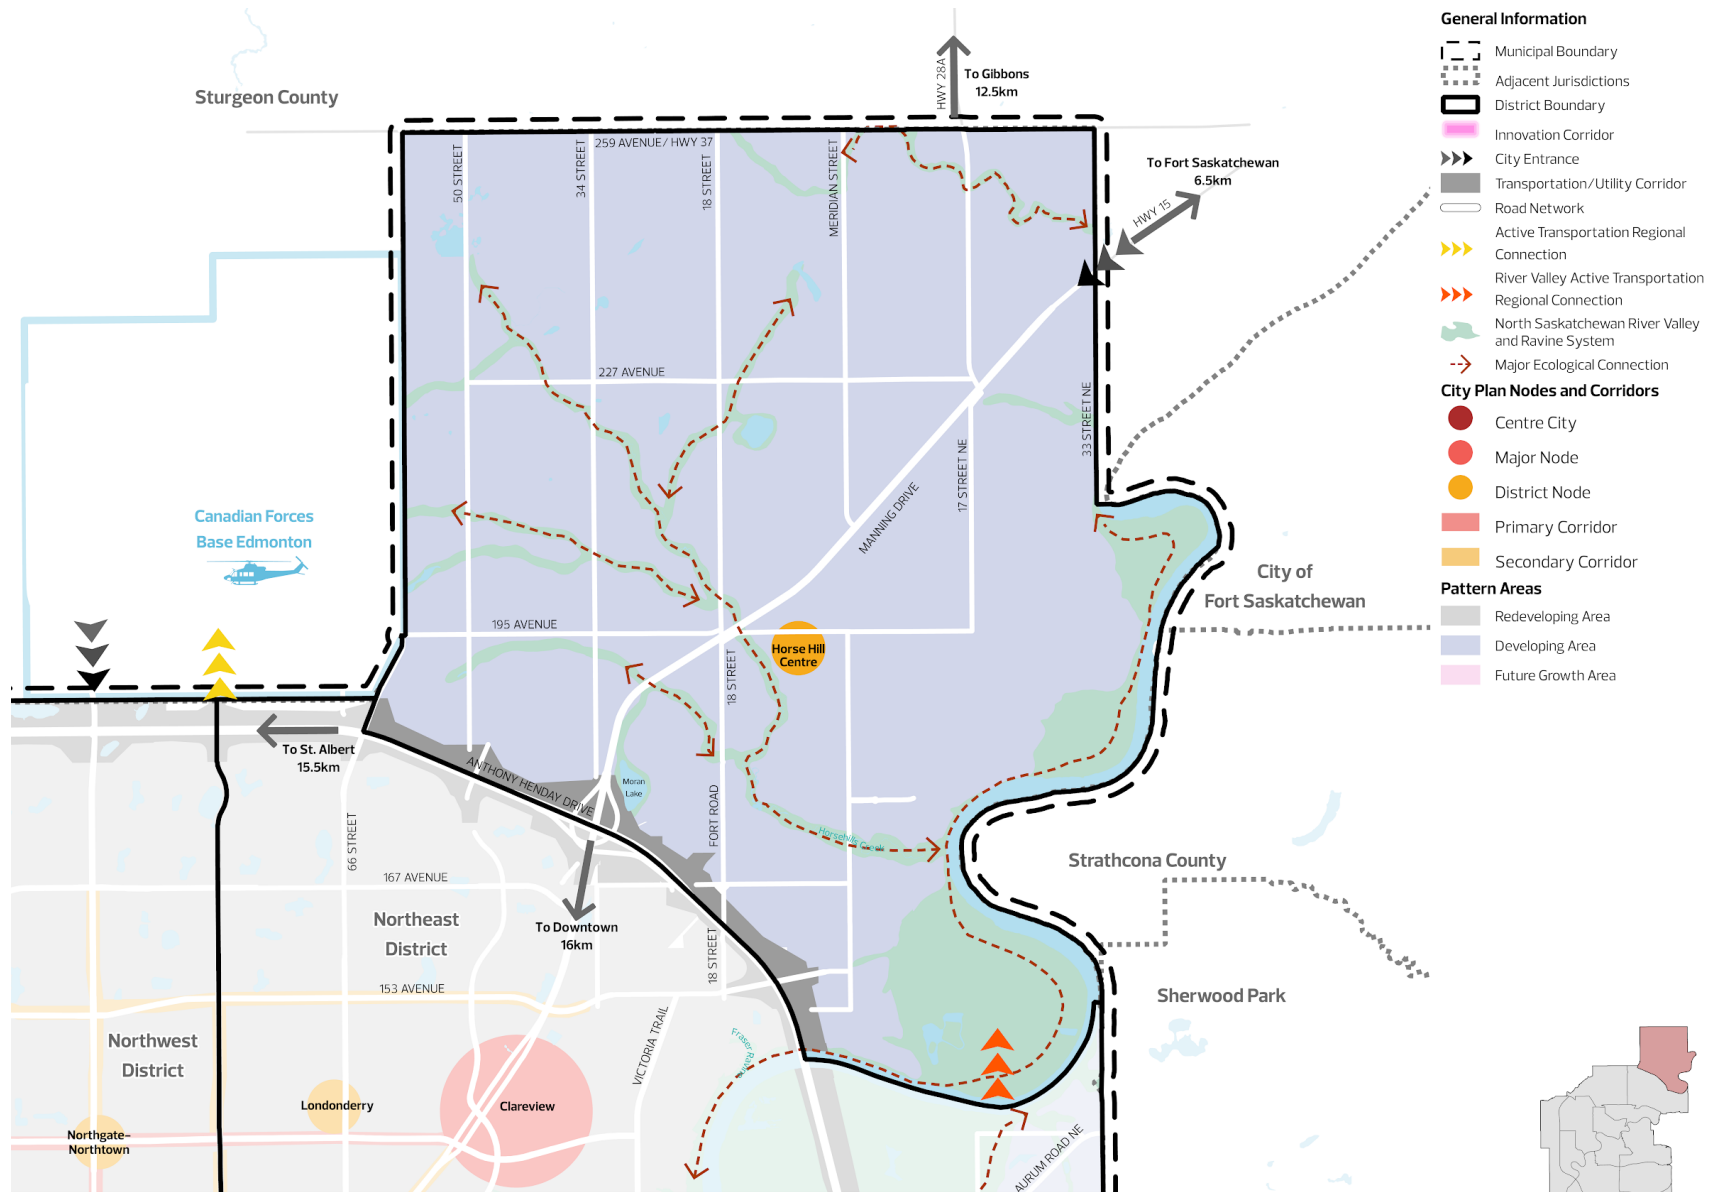

The district includes Moran Lake and portions of the Horsehills Creek Ravine system which connects the area ecologically to the North Saskatchewan River.

[Map 1: Citywide Context](#)

The Citywide Context map focuses on the district's position and location within the city and its relationship to other districts. It highlights the general layout of nodes and corridors and key mobility and ecological connections, within and beyond the district.

Map 1: Citywide Context

Legend items are defined in District Policy Glossary

DRAFT_2023727

2.2 Historical Context

The land within the Horse Hill District is within the traditional territory of many First Nations, including the Nehiyaw (Cree), Denesuliné (Dene), Nakota Sioux (Stoney), Anishinaabe (Saulteaux) and Niitsitapi (Blackfoot). First Nations people lived on and used these lands for all their needs long before European settlers headed west. The area is also part of the Métis homeland. Despite the long and complex relationship of Indigenous peoples with the area, little tangible evidence is visible on the landscape today. More recent colonial land uses erased most of the physical evidence of historic Indigenous land use from the area.

The City acknowledges and understands that Indigenous peoples must tell their own stories and histories from their own experience and in their own voices. District Plans, therefore, do not attempt to tell the stories of Indigenous peoples on this land as part of providing historical context to each district. Historical context is provided, instead, from a settler-colonial perspective generally beginning with the settlement period when the first railways reached the area and Edmonton was incorporated as a municipality.

The Horse Hill name reflects the fact that in the 19th century this area was where the Hudson's Bay Company's Edmonton House horse guard was located. As many as 800 horses were maintained here. The area also contained portions of the Victoria Trail, a pre-contact Indigenous route. After missionaries established the Victoria Settlement in 1862 at what is now Pagan, Alberta, First Nations, Métis and settlers all used the Victoria Trail to travel to and from Edmonton

The Horse Hill District contains two municipal historic structures that tie back to the area's original agricultural development and institutional government uses. Constructed in 1920, The Brick House is the only protected colonial farmhouse in Edmonton that represents the area's past rural and agricultural settlement. The Alberta Hospital Edmonton (then Alberta Hospital), built in 1923, originally served as a provincial mental institute to treat World War I veterans. Today, it is a psychiatric hospital offering in-patient and out-patient programs.

The district's land area was annexed from Sturgeon County in 1982, which brought the manufactured mobile home park of Evergreen and surrounding country residential areas under Edmonton's municipal authority. In 1987, Evergreen and portions of this district were severely damaged by a destructive tornado.

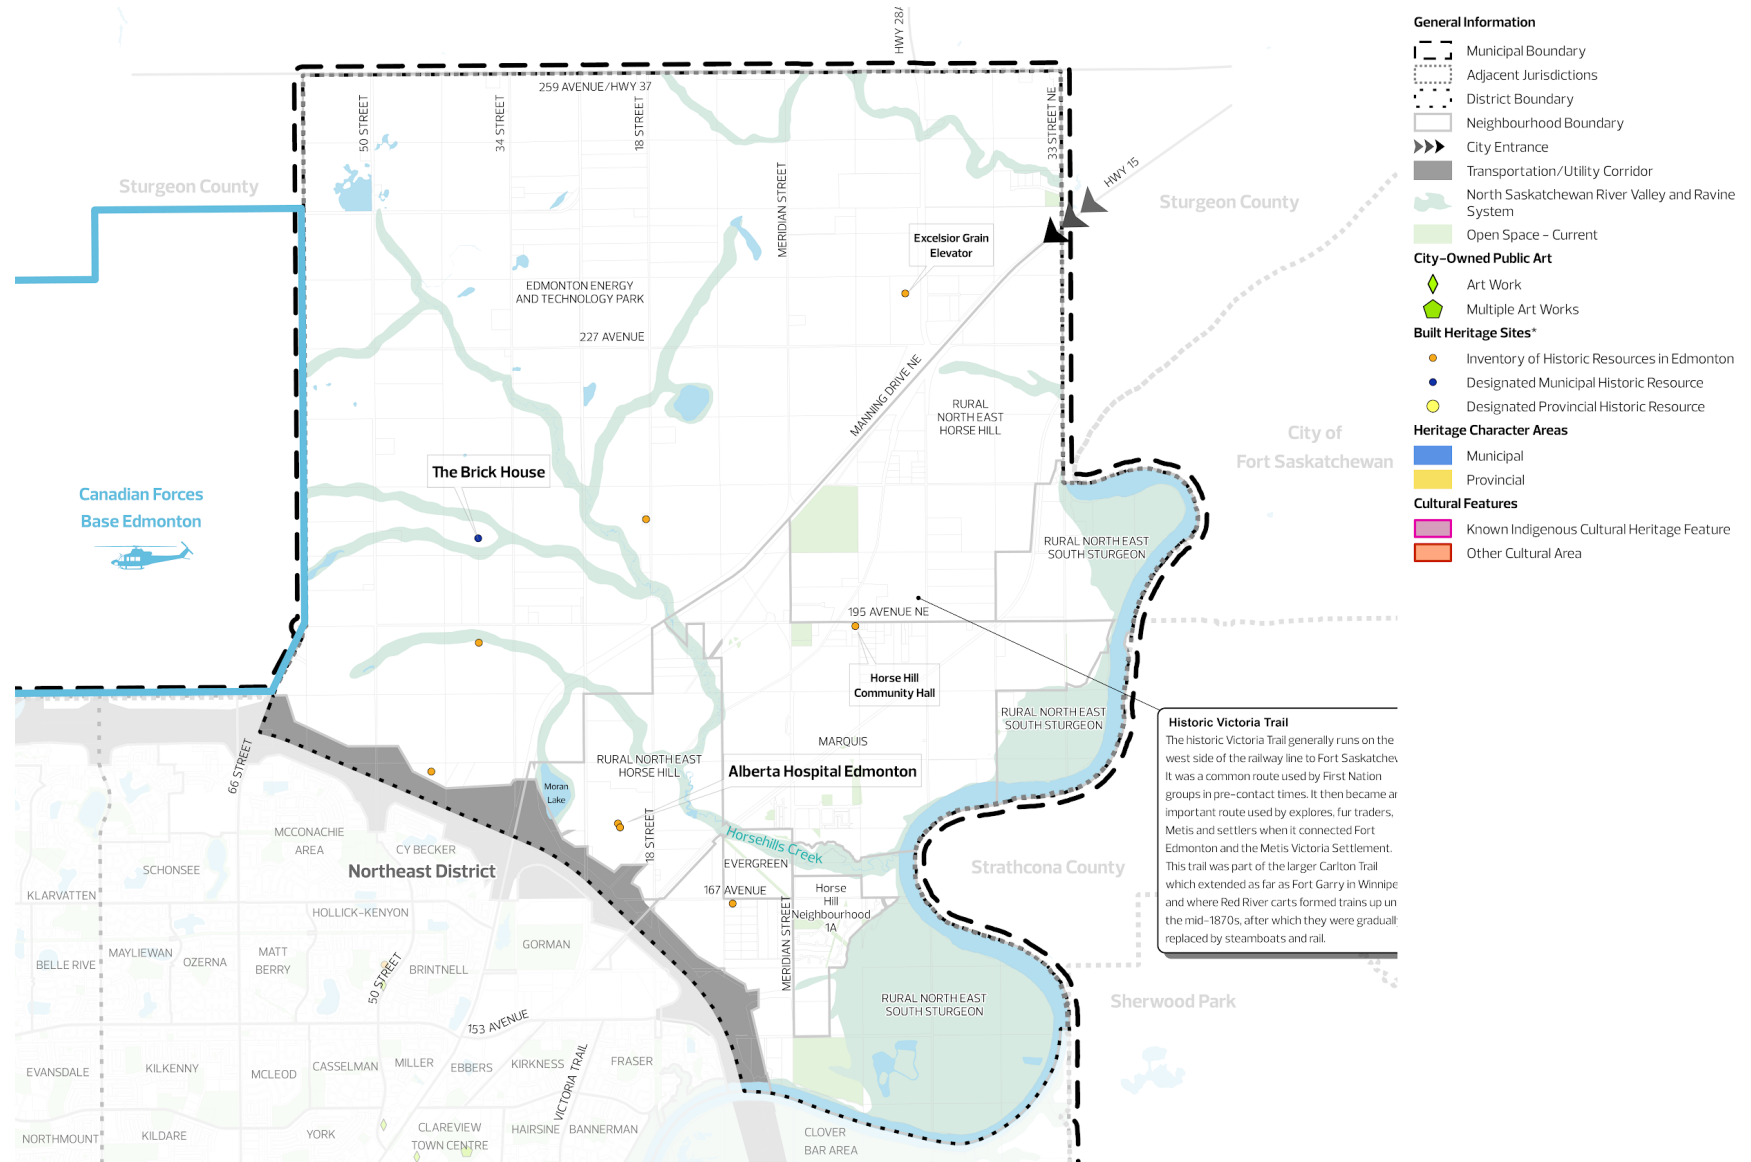

Historical and culturally important locations for this district are identified in [Map 2: Heritage and Culture](#). While only formally-recognized locations have been included, other informally-known significant historic and cultural features from a wide range of groups, cultures and times exist in this area. Future growth and development should preserve, enhance and reflect the diverse heritage of local communities and First Nations, cultural landscapes and historical resources shown through stories, structures and spaces.

Map 2: Heritage and Culture

The Heritage and Culture map emphasizes the built heritage and cultural areas that have been formally endorsed through existing city policies or initiatives. This map includes the City of Edmonton Public Arts Collection and identifies areas or sites that are known by the City of Edmonton to have particular significance to Indigenous communities based on City engagement and relationships with Nations and communities. These maps do not show the location of paleontological/archeological sites.

Historic Victoria Trail
 The historic Victoria Trail generally runs on the west side of the railway line to Fort Saskatchewan. It was a common route used by First Nation groups in pre-contact times. It then became an important route used by explorers, fur traders, Metis and settlers when it connected Fort Edmonton and the Metis Victoria Settlement. This trail was part of the larger Carlton Trail which extended as far as Fort Garry in Winnipeg and where Red River carts formed trains up until the mid-1870s, after which they were gradually replaced by steamboats and rail.

0 0.5 1 Km Scale: 1:80,000 *See City of Edmonton Open Data for latest information
 DRAFT_2023727

2.3 Development Context

Most of the lands within the Horse Hill District are currently undeveloped and remain dedicated to food production given the area's rich Class I soils. Some residential and institutional uses exist within the southern, eastern and central areas of this district between Manning Drive and the North Saskatchewan River. East of Manning Drive are the established residential areas of the Evergreen, as well as country and rural residential developments near Quarry Ridge. Closer to the Anthony Henday is the longstanding Alberta Hospital.

The district is connected to several important regional transportation corridors and provincial highways including Anthony Henday Drive, Manning Drive (Highway 15), 17 Street (Highway 28A) and 259 Avenue (Highway 37), which connect this district to surrounding municipalities in the region.

The Canadian National (CN) Rail crosses the district from its south to northeast boundaries and connects Edmonton to northeastern Alberta and Fort McMurray. This railway connection provides an important method of goods shipment from the Edmonton area to regional and international markets.

Canadian Forces Base (CFB) Edmonton is located along the western boundary of the Horse Hill District. As such, the Edmonton Garrison Heliport Zoning Regulation introduces limitations on the district's northern land uses, and heights, sizes and types of stormwater management facilities and retained wetlands. The Noise Exposure Forecast (NEF) contours identify areas where noise has the possibility to disrupt more sensitive land uses.

Environmentally sensitive areas in this district include the North Saskatchewan River Valley, Horsehills Creek, Moran Lake and several natural tableland-forest patches and wetlands. These areas serve as habitats and corridors for wildlife, allowing movement within the region and beyond the district. Horsehills Creek's eroding banks are a significant development constraint as they limit its use for any significant amount of storm water drainage.

A portion of the Edmonton River Valley and Ravine System is included within the boundary of this district plan and is guided by the North Saskatchewan River Valley Area Redevelopment Plan (1985) and Ribbon of Green strategic plan (2020). The latter is intended to help guide appropriate public use and enjoyment of the river valley while protecting ecologically sensitive areas within the Horse Hill District and Edmonton citywide.

Current Plans in Effect

In the Horse Hill District, the following statutory geographic plans are in effect that provide additional planning and land use direction:

- Edmonton Energy and Technology Park Area Structure Plan – 2010
- Horse Hill Area Structure Plan – 2013
 - Horse Hill Neighbourhood 1A Neighbourhood Structure Plan – 2021
 - Marquis Neighbourhood Structure Plan – 2015
- North Saskatchewan River Valley Area Redevelopment Plan – 1985

The Edmonton Energy and Technology Park Area Structure Plan area is the source of approximately two-thirds of the City of Edmonton's vacant industrial land and is one of four City-designated industrial areas. The Area Structure Plan provides a land use framework to facilitate the development of petrochemical, manufacturing, logistical, business and research uses. As the economy diversifies, it is anticipated that future industrial uses in the area will follow suit. Build out of the area is anticipated to occur into 2050-2070. The Edmonton Energy and Technology Park Area Structure Plan includes plans to incorporate pedestrian and bicycle connectivity and Light Rail Transit (LRT) connections to serve the plan's employment area.

The Edmonton Energy and Technology Park, representing the majority of the city's industrial land supply into the future, was planned in midst of an industrial boom and focused on petrochemical-related industries. It is now anticipated the areas grow to accommodate more traditional industrial activities as well as emerging industries related to the agricultural sector. Given the size of the area, the challenge will be the first stage of development as initial developers will need to invest in services.

The Horse Hill Area Structure Plan is unique in its innovative approaches to urban agriculture that will contribute to Edmonton's sustainable food systems. The Area Structure Plan plans for six residential neighbourhoods and will include a mix of residential interspersed with commercial sites within the district's ecological networks. At the time of plan approval in 2013, development was expected to occur over the next 30 years. The Horse Hill Area Structure Plan directs that existing rural residential housing may remain unless the landowner chooses to redevelop. Rich soils surface in the Horse Hill area due to its close proximity to the North Saskatchewan River, making it a prime agricultural area.

There are two Neighbourhood Structure Plans located within the Horse Hill Area Structure Plan area: Marquis Neighbourhood Structure Plan and Horse Hill Neighbourhood 1A Neighbourhood Structure Plan. The Marquis Neighbourhood Structure Plan was prepared in response to current and anticipated residential market demands in the Edmonton area. The area will accommodate residential development, two school sites and a district park. It will also include a town centre with commercial, business employment and mixed uses. Located in the southeast portion of the district, the Horse Hill Neighbourhood 1A Neighbourhood Structure Plan is characterized by top-of-bank frontage to the North Saskatchewan River and the Horsehills Creek ravine. The plan offers a range of housing options, including existing Country Residential. The remaining four Neighbourhood Structure Plans within the Horse Hill Area Structure Plan are expected to be planned and developed according to market needs.

Map 3: District Context - Assets

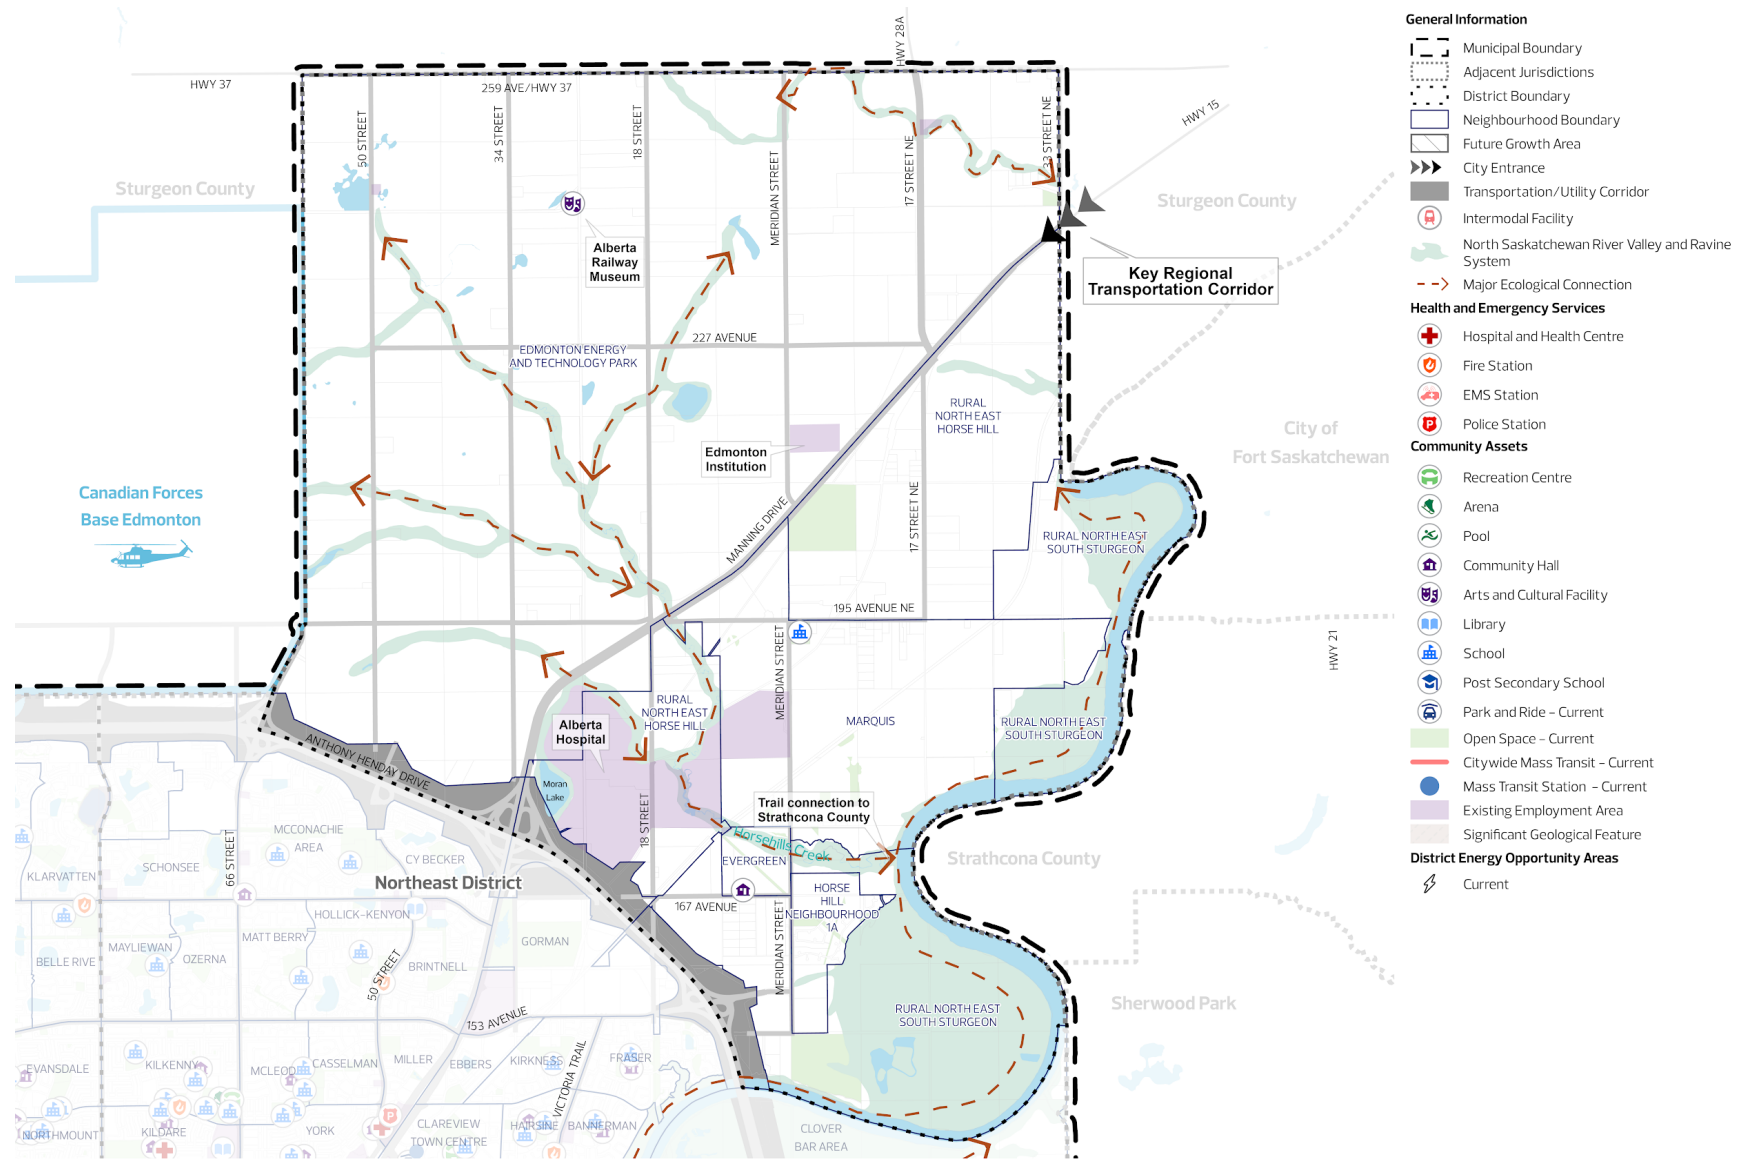

The District Context - Assets map is a snapshot of the existing conditions at the time of plan adoption—and highlights opportunities to implement 15-minute communities. The map includes employment areas, open spaces, emergency services, citywide mass transit routes and cultural, educational and recreational facilities.

Map 4: District Context - Development Considerations

The District Context - Development Considerations map is a snapshot of existing conditions at the time of plan adoption—and highlights constraints to consider when working towards creating 15-minute communities. The map illustrates development considerations, such as deficits and risks.

Map 4: District Context – Development Considerations

Legend items are defined in District Policy Glossary

Scale: 1:80,000
 0 0.5 1 Km
 DRAFT_2023727

Note that some roadway alignments are conceptual. Refer to additional plans in effect (where applicable) for details.
 *Water network capacity is shown on this map within the Node and Corridor boundaries only, and where flow is less than 300 L/s. Refer to Open Data Average Fire Flow by City Block Area Map at data.edmonton.ca for full dataset. **Estimated extents of topographical sags to be used for system planning analysis. Not to be used for detailed design. EPCOR disclaims any liability for the use of this information.

3 District Systems and Networks

Cities are complex. They work best when land use and transportation are considered together with environmental, economic and social factors using a systems approach. [The City Plan](#) calls these systems Managing Growth, Planning and Design and Mobility.

The features shown on **Maps 5 to 10** guide decisions for the orderly growth of the Horse Hill District, including how land is used and supported by infrastructure. All three systems and their interconnections inform planning decisions for how the district will grow and change over time. All terms and map features are defined in the glossary of the [District Policy](#).

3.1 Managing Growth

As the city grows to the 1.25 million resident population horizon outlined in The City Plan, the Horse Hill District will grow and change. This section outlines the district's anticipated population and employment growth and how the City of Edmonton will support this growth.

Population growth in this district will primarily occur in the areas with active Neighbourhood Structure Plans such as Marquis and Horse Hill Neighbourhood 1A. As these neighbourhoods are built, parks, schools and services will be added to provide local amenities.

Employment growth is expected to occur in the Edmonton Energy and Technology Park. This area represents the majority of the city's industrial land supply into the future. Up until the 1.25 population horizon employment growth is anticipated to be modest given the size of the area.

Table 1 provides the anticipated population and employment numbers for the Horse Hill District at the 1.25 million and two million population horizons of [The City Plan](#). This considers the Horse Hill District's population contributions within citywide growth expectations for the 1.25 million and 2 million population horizons.

Table 1 - Anticipated District Population and Employment Numbers

	Federal Census 2021*	City Plan 1.25 Million Population Horizon	City Plan 2 Million Population Horizon
District Population	3,000	3,500	45,000
District Employment	4,000	9,000	64,000

* 2021 figures are calculated with the 2021 Federal Census using census tract level data. Figures will be updated when neighbourhood-level census data becomes available.

The way the district looks and feels will change as development projects are completed. Development and change will happen district-wide but more growth and higher-density development will occur in the district's nodes and corridors. Shifts in local demographics and changing economic conditions will also play roles in shaping the district's employment and population growth.

The City Plan establishes an approach to growth management to support Edmonton's growth in a socially, environmentally and fiscally responsible way. This district plan identifies areas within the district where growth will occur, such as nodes and corridors and new neighbourhoods. Public investments will encourage and support growth. The growth and infrastructure of new neighbourhoods are described in greater detail in local plans, such as Area Structure Plans and Neighbourhood Structure Plans.

The City may lead, facilitate and/or fund many of the initiatives and projects shown in the maps. Community, industry or intergovernmental-led projects will also be important to the district's success. Similarly, smaller local improvements that are not listed in this plan (e.g. street lighting, traffic calming, public space programming) can also support activation.

Priority Growth Areas

Priority Growth Areas are the nodes and corridors that are expected to experience more development (compared to other locations) as the City grows to a population of 1.25 million. It is expected that investment in these areas will contribute to [The City Plan's](#) implementation over the long term.

Prioritized investment is intended to support the development of nodes and corridors in line with The City Plan's phasing and activation approach. This combines The City Plan's activation treatments (Strategize, Invest, Nurture), The City Plan levers of change (policy, partnerships, pricing, investment) and the anticipated dwelling unit growth to 1.25 million (see City Plan Maps 10A and 11A). It also allows the City and its city-building partners to align the timing and locations of investment.

Priority Growth Areas are typically concentrated in the redeveloping areas of the city. Most districts with new neighbourhoods do not have Priority Growth Areas. Growth in these neighbourhoods is directed by local plans.

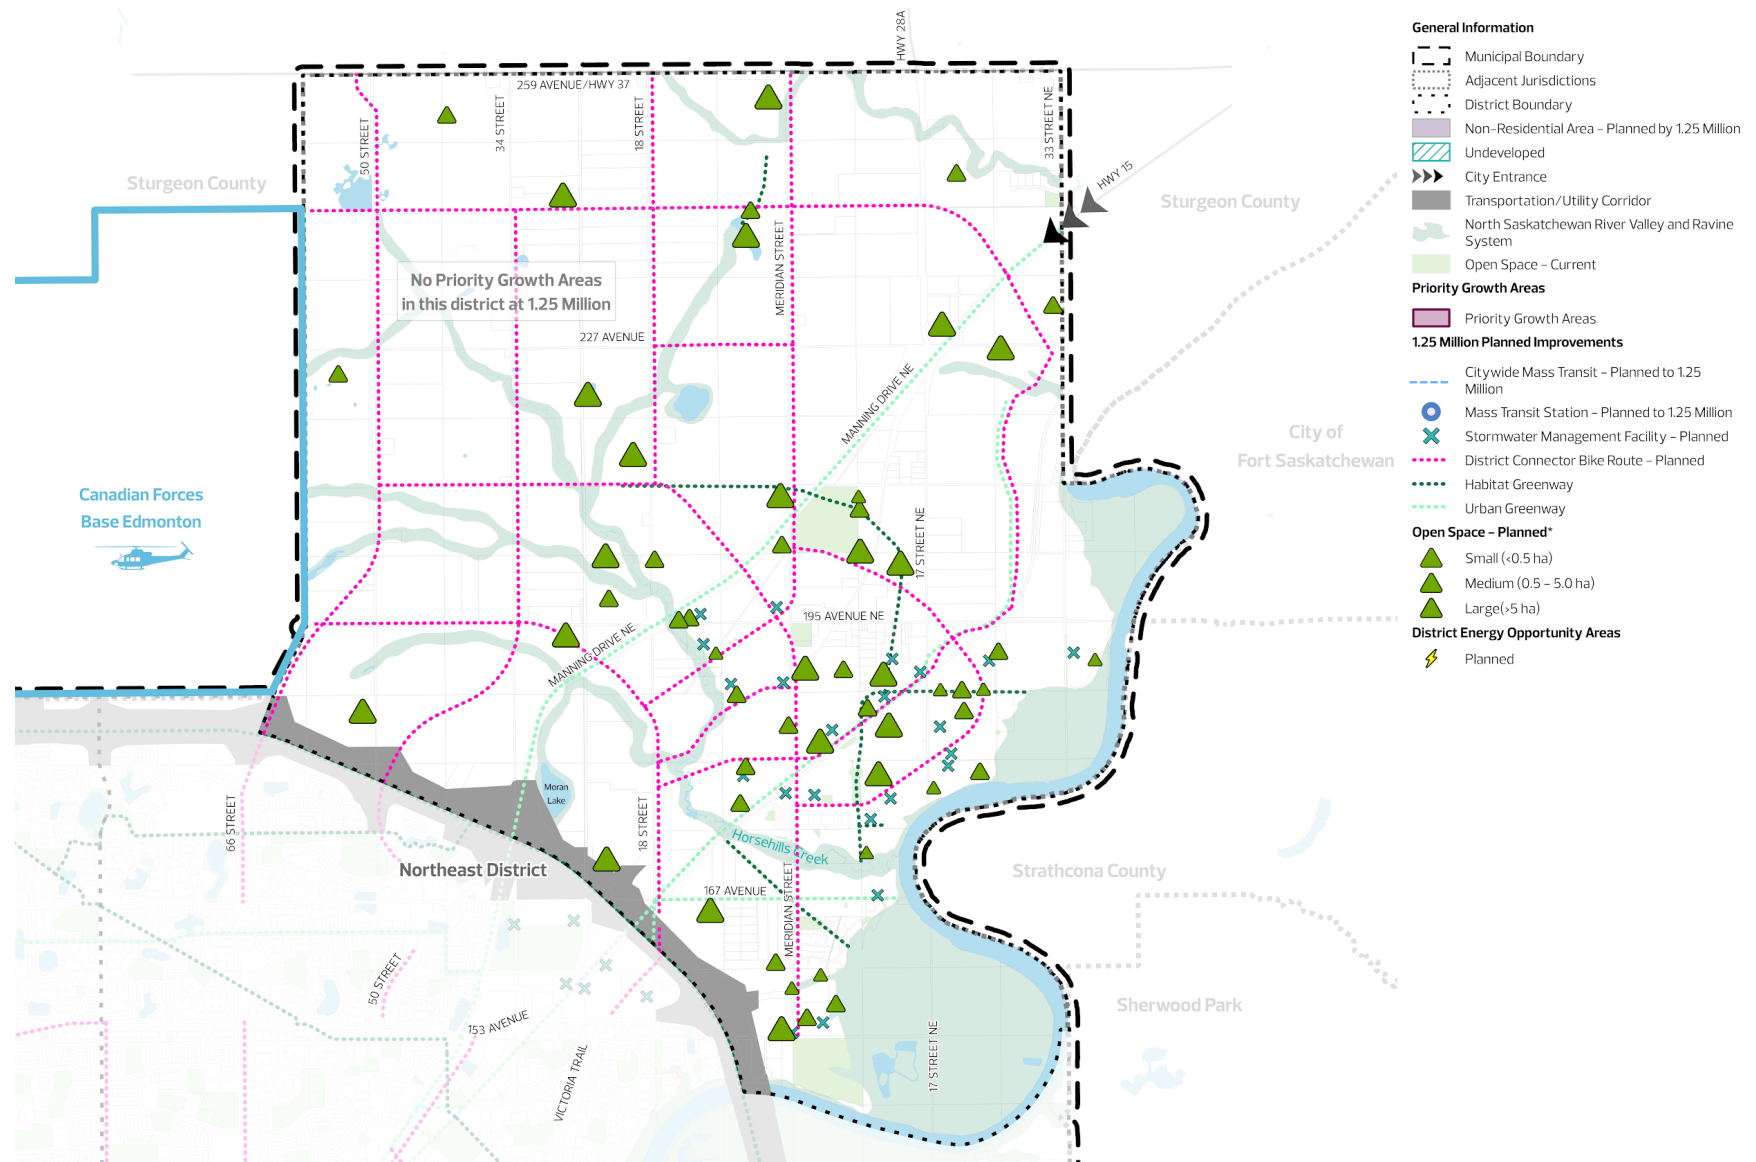

There are no Priority Growth Areas in the Horse Hill District.

Map 5: Managing Growth to 1.25 Million

Managing Growth to 1.25 Million communicates geographic growth priorities and the City's expected major actions to support Edmonton's growth to 1.25 million people, such as investments in transit, active transportation and open spaces. These investments, along with others in utilities, transportation and community infrastructure will support existing and future residents. In particular, the map identifies nodes and corridors that are Priority Growth Areas and describes how changes to these areas will look and feel in the future.

Map 5: Managing Growth to 1.25 Million

Legend items are defined in District Policy Glossary

0 0.5 1 Km Scale: 1:80,000 *May include urban services. See additional plans in effect (where applicable) for details.
 DRAFT_2023727

3.2 Planning and Design

The Planning and Design system is about using land to ensure that there are opportunities for a variety of housing, employment and open spaces in each district. The Planning and Design system is made up of the following networks:

- Nodes and Corridors Network establishes logical areas to focus population and employment growth. The extent of this network is designed to accommodate Edmonton's growth to two million people.
- Green and Blue Network includes water bodies, open spaces, greenways and ecological connections throughout the city. It provides places to recreate, celebrate and recharge.
- Non-Residential Opportunities Network includes commercial and industrial -focused areas, as well as major institutions, to create productive and desirable places to attract investment and talent to the city. This provides employment opportunities and encourages ongoing investment.

District maps that show Planning and Design direction include:

- [Map 6: Land Use Concept to 1.25 Million](#)
- [Map 7: Nodes and Corridors](#)
- [Map 8: Open Space and Natural Areas to 1.25 Million](#)

Steps toward building these networks are already occurring and will continue as Edmonton grows to 1.25 million and beyond.

Map 6: Land Use Concept to 1.25 Million

The Land Use Concept to 1.25 Million map shows the district's statutory geographic plans and the broad land use categories and design influences planned for new growth and redevelopment as Edmonton reaches 1.25 million people. It combines and integrates all Planning and Design Networks, showing how they work together to achieve the district's expected growth.

Map 7: Nodes and Corridors

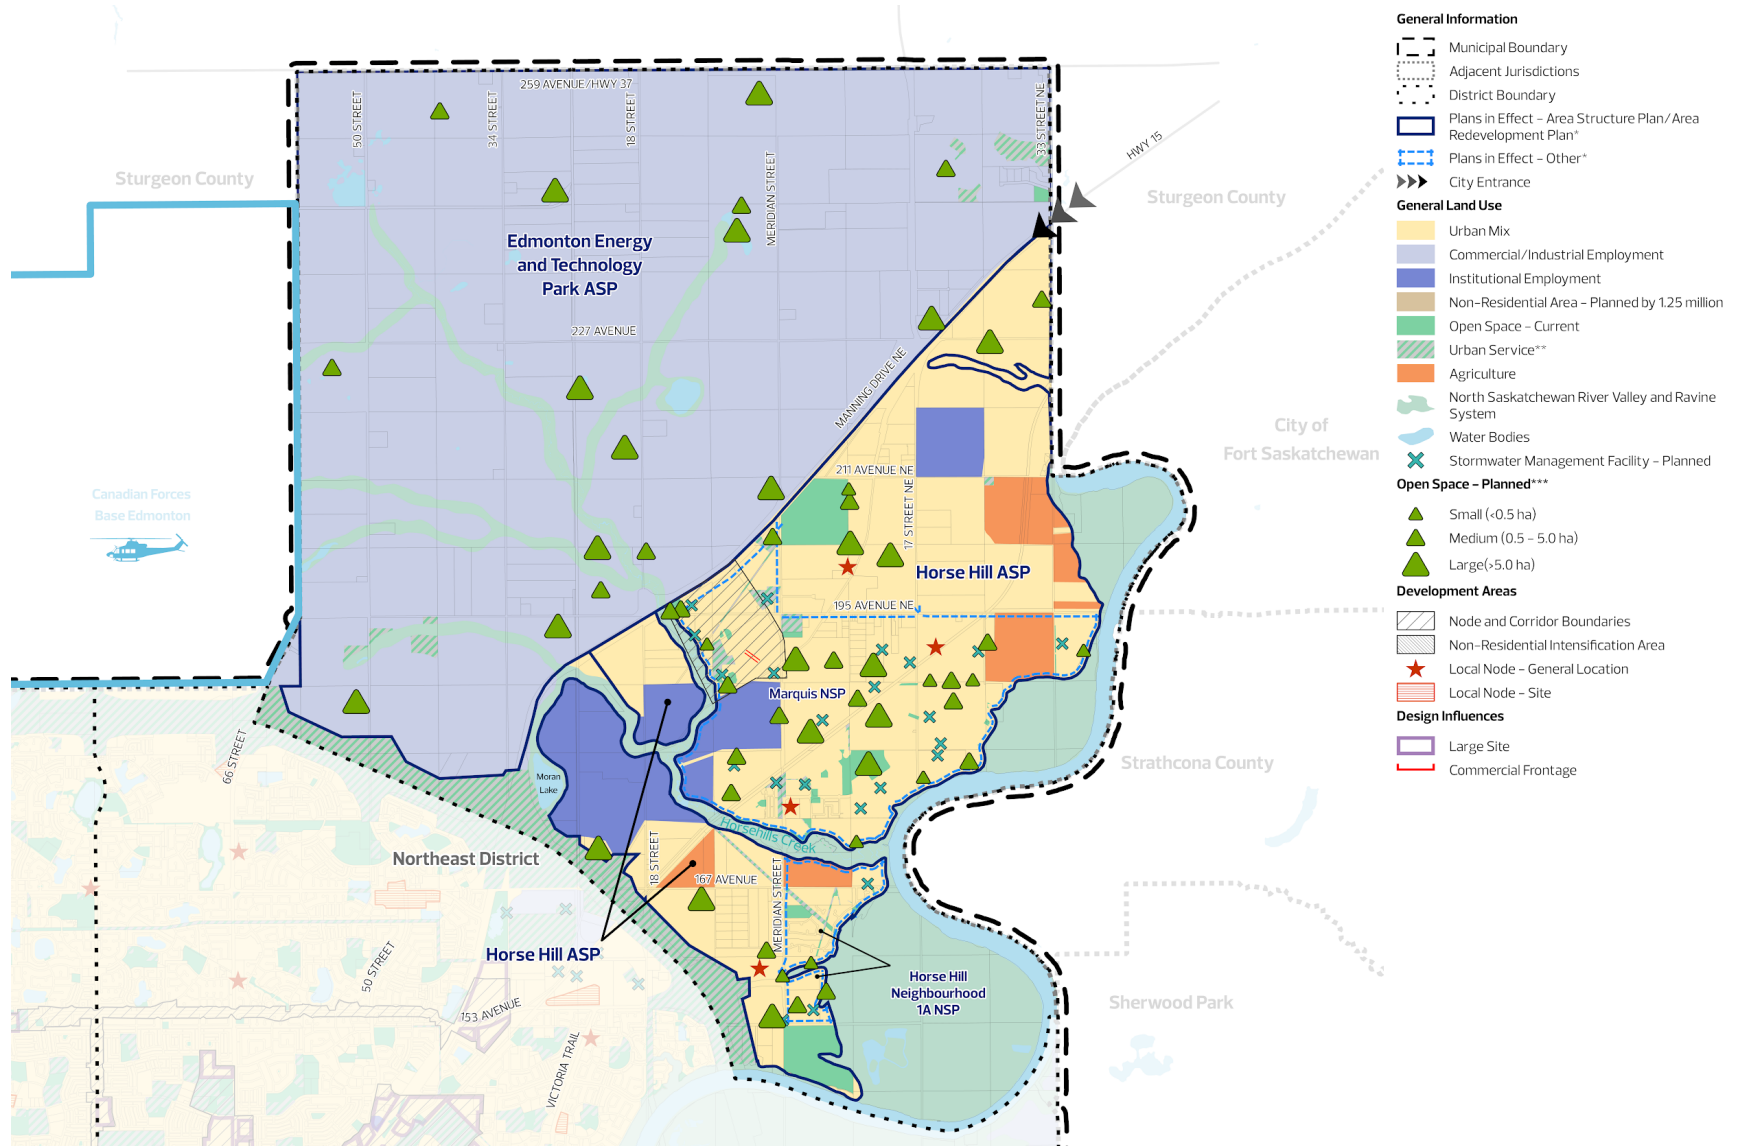

The Nodes and Corridors map elaborates on the conceptual Nodes and Corridors Network in [The City Plan](#) by more clearly identifying their boundaries. It shows areas of focus for population and employment growth, as well as the types of roads found in the Roads and Goods Movement Network. The map acts as additional information to understand and apply the land use categories shown in [Map 6: Land Use Concept to 1.25 Million](#). The appropriate scale of development depends on the type of node and corridor and roadway types, as described in the [District Policy](#).

Map 8: Open Space and Natural Areas to 1.25 Million

The Open Space and Natural Areas to 1.25 Million map elaborates on the Green and Blue Network in The City Plan with more detail and geographic specificity, including open space types and connections. The map features current and planned publicly-owned open spaces and parks as Edmonton reaches 1.25 million people. Some planned open spaces shown may be built beyond 1.25 million people, subject to growth patterns. Connections are linear greenways and open spaces supporting wildlife movement and public access to the district's natural systems.

Map 6: Land Use Concept to 1.25 Million

 - Civic Spaces and Squares - Current
 - Civic Spaces and Squares - Planned
- Planned Park Sizes**
 - △ Small (<0.5 ha)
 - △ Medium (0.5 ha-5.0 ha)
 - △ Large (>5.0 ha)
- Other Open Space**
 - Special Purpose Facility
 - Cemetery
 - Golf Course
 - Open Space - Other
 - Provincial Park/Protected Area

Scale: 1:80,000

*Open Spaces may include urban services. Planned Open Space locations are conceptual and subject to planning stages and development timing. See additional plan in effect (where applicable) for details.

3.3 Mobility

The Mobility system is about moving people and goods in an efficient and accessible manner. Any vibrant and prosperous city must have integrated transportation networks that provide residents with convenient options. Such a system should facilitate opportunity, connection and health while being safe, inclusive and barrier-free for all users. The Mobility system is made up of the following networks:

- Active Transportation Network creates critical connections using walking, rolling or biking that allow people to access destinations, amenities, daily needs and recreational opportunities.
- Transit Network provides city-wide, district and regional connectivity using mass transit, prioritizing accessible, reliable and safe services.
- Roadway and Goods Movement Network will facilitate economic development, provide access to business and employment and support regional connection and prosperity. The network includes Arterial Roadways, Principal Roadways, Expressways, Freeways and Provincial Highways.

District maps that show Mobility direction and the Roads and Goods Movement Network include:

- [Map 7: Nodes and Corridors](#)
- [Map 9: Active Transportation to 1.25 Million](#)
- [Map 10: Transit to 1.25 Million](#)

Map 9: Active Transportation to 1.25 Million

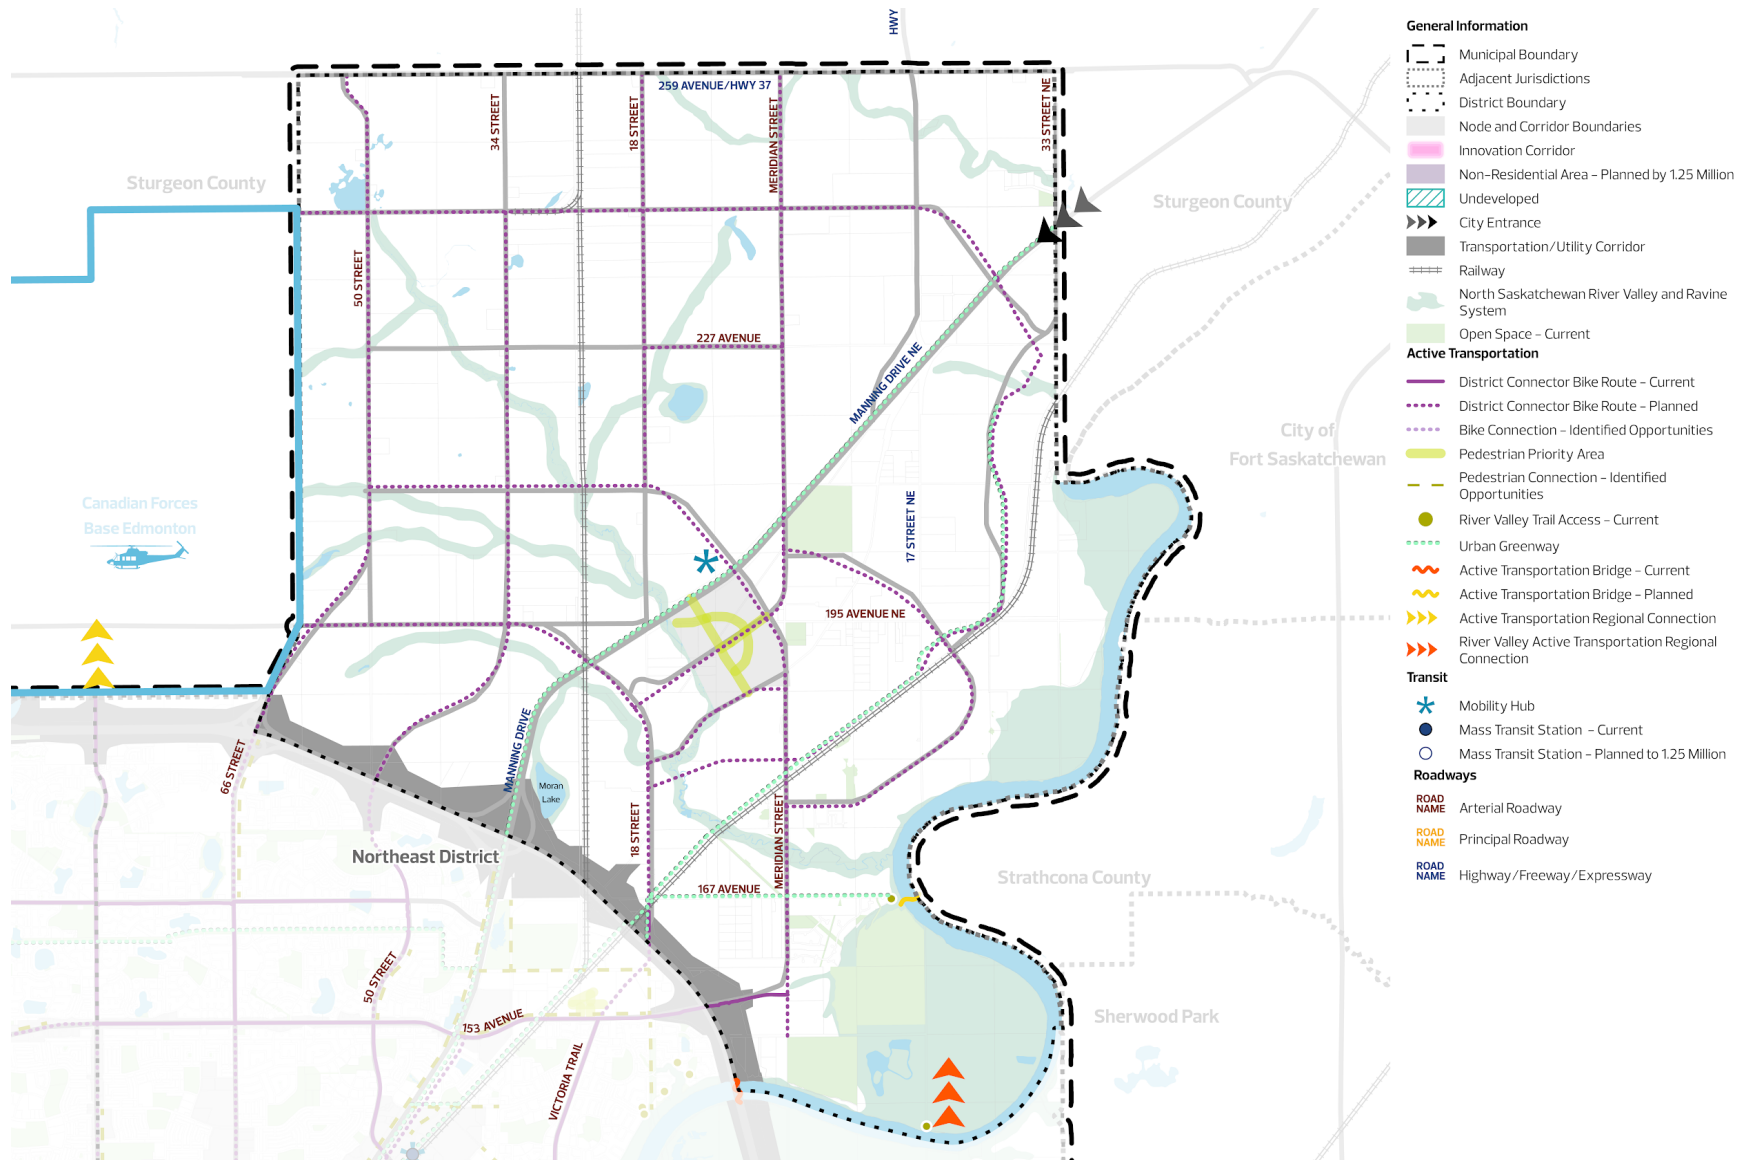

The Active Transportation to 1.25 Million map shows both the current and planned Active Transportation Network from The City Plan, the connections with mass transit stations and the interaction with the Roadway and Goods Movement Network that, together, form Edmonton's mobility system. This map identifies the district-level walking, cycling or rolling pathway intentions for the district's Active Transportation Network when Edmonton reaches 1.25 million people. For the complete Active Transportation Network once Edmonton reaches two million people, see The City Plan.

Map 10: Transit to 1.25 Million

The Transit to 1.25 Million map shows both the current and planned transit system from The City Plan and the interaction with the Roadway and Goods Movement Network that, together, form Edmonton's mobility system. This map identifies citywide and district-level bus or LRT routes intended for the district's mass transit system when Edmonton reaches 1.25 million people. For the complete Mass Transit Network once Edmonton reaches two million people, see The City Plan.

Map 9: Active Transportation to 1.25 Million

4 Area-Specific Policy

This Area-Specific Policy section lists additional or exceptional policies as well as other geographic plans and tools to consider when making land use decisions for specific areas of the district. The information in this section must be considered alongside the [District Policy](#) for complete planning direction.

Policies in this section may include:

- Planning guidance that must be considered in addition to that found in the District Policy, or
- Planning guidance that is an exception to policies found in the District Policy

Reference [Map 11: Area-Specific Policy Subareas](#) to identify the geographic areas where additional or exceptional policies apply in this district and [Table 2: Area-Specific Policy](#) for the detailed policy direction. In the event of a conflict between **Table 2** and the District Policy, **Table 2** shall prevail.

Where no specific policy applies for a particular location on **Map 11**, refer to the district plan maps and District Policy for planning guidance.

Refer to [Section 1.2](#) 'Authority and Relationship to other Plans' of this district plan for information on how any geographic plans listed in **Table 2** shall be read with the District Policy and this district plan.

Map 11: Area-Specific Policy Subareas

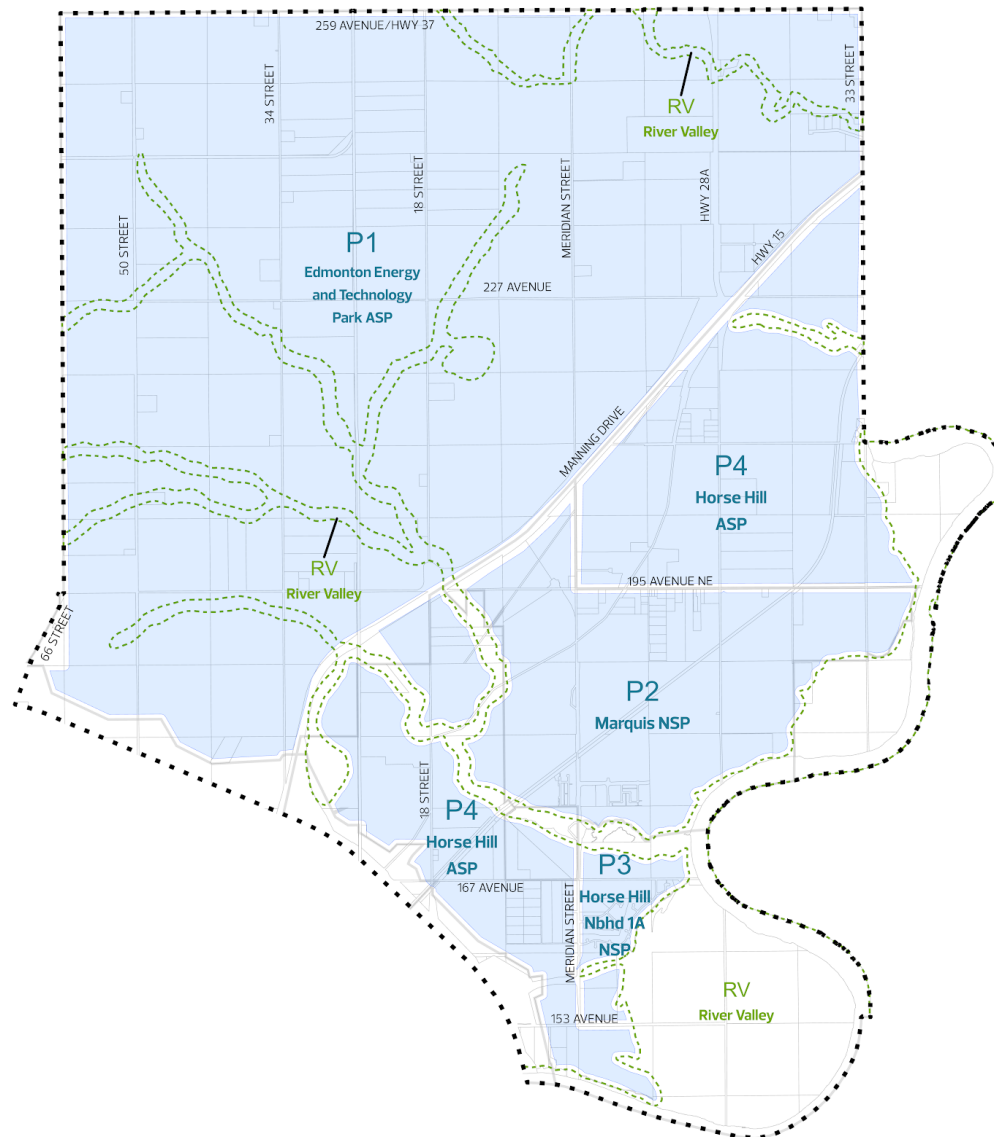

Table 2 - Area-Specific Policy Table

Subarea	Additional or Exceptional Policy
P1	P1-1 Edmonton Energy and Technology Park Area Structure Plan For further planning direction refer to the Edmonton Energy and Technology Park Area Structure Plan.
P2	P2-1 Marquis Neighbourhood Structure Plan For further planning direction refer to the Marquis Neighbourhood Structure Plan and Horse Hill Area Structure Plan.
P3	P3-1 Horse Hill Neighbourhood 1A Neighbourhood Structure Plan For further planning direction refer to the Horse Hill Neighbourhood 1A Neighbourhood Structure Plan and Horse Hill Area Structure Plan.
P4	P4-1 Horse Hill Area Structure Plan For further planning direction refer to the Horse Hill Area Structure Plan.
RV	RV-1 North Saskatchewan River Valley and Ravine System Refer to the North Saskatchewan River Valley Area Redevelopment Plan and Ribbon of Green Strategic Plan for additional planning direction and strategic context.

Where no subareas have been identified, the [District Policy](#) and district plan maps (Maps 1 to 10) shall guide planning decisions.

5 Growth to 2 Million

"This is why the time is now to plan ahead. It's not a matter of if we will hit two million but when. The best way for our children and grandchildren to have as positive an experience with their city as we enjoy today - an even better one - is to imagine what that city will look like, how it will operate, how it will grow, how businesses will flourish, how parks will welcome all and how creativity will thrive." - The City Plan

Cities are constantly evolving and responding to a changing world. [The City Plan](#) describes the choices Edmonton needs to make to become a healthy, urban and climate-resilient city of two million people that supports a prosperous region. This vision will take Edmonton time to achieve and the work towards a population of two million will continue beyond this iteration of the district plan. After Edmonton reaches 1.25 million people, district level planning will continue to support the development and transformative change of communities for the next population horizons outlined in The City Plan: 1.5 million, 1.75 million and two million people. The City Plan provides wide-ranging directions for Edmonton's long-term future - what the city and districts will look like at two million people and what needs to be done to support growth to create a great place to live.

[Map 12: Vision at 2 Million](#) captures how the Horse Hill District is expected to continue to evolve beyond the 1.25 million population horizon of this district plan and in alignment with The City Plan, as Edmonton reaches two million people.

Development and investment in the Horse Hill District may include the following:

- The building out of the Horse Hill Centre District Node and the residential areas under the Horse Hill Neighbourhood 1A and Marquis Neighbourhood Structure Plans
- Creation and strengthening of local nodes to provide commercial services and additional housing options within neighbourhoods.
- Opportunities for land use diversification and more employment activity within the Edmonton Energy and Technology Park.
- Additional investments in mass transit in order to continue to support the node and corridor network, specifically the Horse Hill Centre District Node.

Both the public and private sectors have roles in initiating and advancing growth opportunities. Growth may also be supported by City investments in the physical, environmental and social networks to complement [The City Plan's](#) networks as well as create additional networks to activate growth in the district. The goal is to be ready for the continual, collaborative shaping of the future.

Map 12: Vision at 2 Million

The Vision at 2 Million map provides an aspirational illustration of the district when Edmonton reaches two million people. The map includes a 3D model of the district to emphasize areas of change based on The City Plan's systems and growth targets. The detailed illustrations show examples of how The City Plan's vision might unfold in specific areas of the district. **This map is not intended to guide specific land and development decisions but to indicate the general direction and high level vision for what the district might look like in the future.**

Map 12: Vision at 2 Million
