

## 2015 City Operations Greenhouse Gas Inventory

	Fuel Type carbon dioxide equivalent tonnes (thousands)					
Operational Sources	Electricity	Natural Gas	Transp. Fuels	Other	Total	%
Buildings	146	71	0	0	<b>217</b>	61.4%
Street Lighting	67	0	0	0	<b>67</b>	19.0%
Landfills	0	0	0	43	<b>43</b>	12.2%
Municipal Fleet	0	0	29	0	<b>29</b>	8.2%
Urban Forest	0	0	0	(3)	<b>(3)</b>	(0.8%)
Total	<b>213</b>	<b>71</b>	<b>29</b>	<b>40</b>	<b>353</b>	100%
%	60.2%	20.2%	8.3%	11.3%	100%	

Note: According to generally accepted greenhouse gas reporting protocols, emissions from public transportation should be reported as part of a Community Greenhouse Gas Inventory; not a City Operations Greenhouse Gas Inventory. Accordingly, greenhouse gas emissions from Edmonton Transit (which totaled approximately 125 thousand carbon dioxide equivalent tonnes in 2015) are not shown in the above table.
