## Summary

### Significant Capital Project Update

Budget and Schedule Variance Summary\*

|  | <u>Jun-24</u> | <u>Dec-23</u> |
|--|---------------|---------------|
| Project Budget Variance                      |               |               |
| Within or Under Budget (green)               | 77            | 86            |
| Over Budget up to 20% (30% Develop) (yellow) | 10            | 5             |
| Over budget > 20% (30% Develop) (red)        | 1             | 2             |
|  | 88            | 93            |
| Project Schedule Variance                    |               |               |
| On Time or Ahead of Schedule (green)         | 74            | 78            |
| Delay up to 20% (30% Develop)(yellow)        | 8             | 6             |
| Delay > 20% (30% Develop)(red)               | 6             | 9             |
|  | 88            | 93            |
|  |               |               |

<sup>\*</sup>Project status in the charts above are presented with green status on the bottom, yellow in the middle, and red at the top. The status charts are weighted by the profile's approved budget. Projects within the green or yellow status are considered to be within an acceptable tolerance.

The Budget and Schedule Variance Summary includes the cumulative budget and schedule status of individual projects below the \$20 million significant project threshold that are within composite profiles. Those specific projects are not individually identified in the % Over Budget and % Delay project lists as they are not considered significant capital projects based on the \$20 million threshold.

| Comments (including funding implications if any)  Downtown District Energy is an initiative involving the Winspear Centre and EPCOR. Design and construction are underway and completion and commissioning are expected to be on schedule. Since the project commenced the scope changed to heat only infrastructure, updated electrical design, design advancements, and structural changes to the building.  |                                |   |   |                               |                     |                                 |                               |               |   |                    |  |  |

| Comments (including funding implications if any)  This composite program supports the development and delivery of the Blatchford District Energy Sharing System Infrastructure capital growth projects. The next development phase is the development of the Sewer Heat Exchange Energy Centre in the Blatchford Market Area. The related planning, design and construction activities for these initiatives are integrated in the upcoming four-year budget cycle in 2027-2030. |                                |   |   |                               |                     |                                 |                               |               |   |                    |  |  |

| Comments (including funding implications if any) | Procurements are expected to be on target, however delivery of units is subject to supplier production and delivery schedules. Waste and Fleet have conducted a thorough review of required purchases and are actively procuring equipment a year in advance to ensure timely deliveries of growth and replacement units can meet operational requirements. |   |   |                               |                     |                      |                               |                                       |         |  |                                      |

### **Definitions**

**Significant Capital Project** - Project that has an approved budget greater than or equal to \$20 million over the 2023-2026 time period. Projects may also include those that are highly strategic, complex, have many stakeholders, have major constraints and/or include a high level of risk.

**Red Project Status** - Develop stage projects with a greater than 30% variance from adjusted original budget or schedule. Deliver stage projects with greater than 20% variance from adjusted original budget or schedule. Profiles/projects not being delivered under the Project Design and Deliver Model with greater than 20% variance from adjusted original budget budget or schedule. Project status to be assessed qualitatively when budget or schedule assessments are not available.

**Yellow Project Status** - Yellow status is meant to flag profiles that are projecting over the approved budget or schedule, but still within an acceptable tolerance. Develop stage projects report yellow status when between 0%-30% variance from adjusted original budget or schedule. Deliver stage projects report yellow status when between 0%-20% variance from adjusted original budget or schedule. Legacy projects report yellow status when between 0%-20% variance from adjusted original budget or schedule. Project status to be assessed qualitatively when budget or schedule assessments are not available.

Green Project Status - Project is on/under cost and on/ahead of schedule.

**Original Budget** - A significant capital project's budget when initially approved for the scope outlined in the profile. This field is not applicable for composite profiles.

Adjusted Original Budget - Significant capital projects will report against the profiles adjusted original budget, which will equal the original approved budget (at checkpoint 3/4 when applicable) adjusted for partner or City Council directed scope changes.

Current Approved Budget - The most recent budget as approved by City Council including all scope and cost adjustments.

% Delay (Project Schedule Variance %) - Calculated as the difference between the Estimated or Actual In Service Date and Budgeted End Date in comparison to the estimated project duration. (Estimated or Actual In Service Date - Budgeted End Date)/(Budgeted End Date - Estimated or Actual Start Date).

**% Over Budget (Project Cost Variance %) -** Calculated as the difference between the Total Projection and the Adjusted Original Budget. (Total Projection -Adjusted Original Budget)/(Adjusted Original Budget)

Profile-to-Date Actuals - Total project cost from inception of the project to the reporting date.

Total Projection - Estimated costs over the life of the project/profile.

Estimated or Actual Start Date - Month and year the project commenced based on the date cumulative project costs are expected to be or are greater than \$10,000.

**Budget End Date** - Month and year the project is expected to be completed based on the Current Approved Budget. This may differ from the completion date based on the Original Budget if subsequent budget adjustments have changed project timelines.

**Actual or Estimated In Service Date** - Month and year the asset is expected to be available for use. Total project costs may not be incurred by this date, however the asset is available or is expected to be available for use.

**Project Phase** - Identifies whether a project is reporting in the develop, deliver, or is being considered a legacy project for the purposes of calculating the status of the project. Departments outside of Integrated Infrastructure Services (IIS) will continue to report as legacy until adopting a similar project deliver model to IIS.

**Funding Implications** - Funding implications identifies any impacts to external funding sources, such as federal/provincial grants or partnership funding, due to delays to the project.

**% of Active Budget -** This percentage represents the sum of budgets for active projects within a composite profile as a proportion of the composite profiles total budget. This field is only included for composite reporting in IIS.

**Budget and Schedule Status -** % within acceptable tolerance - This percentage represents the sum of active projects within a composite profile reporting within an acceptable tolerance as a proportion of the number of active projects within the composite. This field is only included for composite reporting in IIS.
