

EFRS Alarm Calls (2019-2024)

Edmonton Fire Rescue Services - Alarms Call with Forecast

2024 data has been annualized

The “Unwanted Alarm” estimation is based on a retroactive analysis of Alarm Calls using the new definition for Unwanted Alarm. This analysis confirmed that approximately 90% of all Alarm Calls were unwanted, indicating that there was no danger or possibility of danger to the safety, health and welfare of people, property or the environment.
