

List of Major Facilities

The major facilities within the Bylaw boundaries include:

- 1) Two modifications to the west boundaries of the project area in Henrietta Muir Edwards Park (HMEP): a) exclusions to reduce impacts on the abandoned Mill Creek channel north of 98 Avenue and b) an inclusion to capture all lands occupied by an existing, under-utilized picnic area and shelter that was identified in the 2013 EISA by Community Services as available for demolition as part of the Valley Line project.
- 2) Inclusion in the Project Area of a small parcel of land at HMEP entrance to allow for more flexibility in provision of temporary pedestrian access to the 98 Avenue pedestrian bridge during LRT construction.
- 3) Potential installation of ground anchors as a means of support for the previously identified retaining walls at two locations and potential for ground anchors to extend beyond the previously-defined project boundaries but remaining within City-owned lands.
- 4) Inclusion in the Project Area of a small parcel of land at the top of Connors Hill to allow for relocation of ski hill infrastructure and associated slope re-grading as mitigation for project impacts on one Edmonton Ski Club run.
- 5) Closure/demolition of a one-way road connecting northbound Connors Road to the Muttart Access Road. This component falls within the Project Area identified in the 2013 EISA.
- 6) Locating the replacement Muttart Conservatory storage building and associated yard slightly southeast of the previously-approved location and overlapping the 2013 Project Area boundary, to reflect recent design, greenhouse operations and potential future access to other park lands. This component is no longer part of the P3 project and will be early works by the City.
- 7) Construction of a temporary, short, connecting trail in LMRP, outside the Project Area, to provide for improved internal pedestrian circulation during the LRT construction period. This will be early works by the City.
