Mixed Topic survey is composed of a variety of questions on various topics that help different departments make decisions using public feedback. This document highlights what we heard from the Insight members on the topic of City Hall Child Minding program included in the August 2019 Mixed Topics survey.

As it is a non-random online survey, a margin of error is not reported for these results. However, if a probability sample had been used results for a random sample of 2,695 would be accurate to  $\pm 1.9$  percentage points, 19 times out of 20.

*Note: 4 anonymous individuals accessed the survey link through the City website. While reporting back to the Insight Community members through this monthly report, we only include the survey results for the members.*
