

**Modular Construction Technology - More Information**

The below project examples provide an indication of the design and built-form outcomes that can be obtained using modular construction methods. As an alternative form of construction, these building components require specific certification at the manufacturing location for code compliance. If this cannot be met then engineering must be provided for approval.

**The Triumph - Washington, DC**

36,000 sq ft | 6 stories | 50 units | Short-term Family Housing

**Sarah Ross House - Vancouver, BC**

22,781 sq ft | 3 stories | 52 units | Supportive Housing

**Margaret Mitchell Place - Vancouver, BC**

21,139 sq ft | 3 stories | 52 units | Supportive Housing

**Hotel Conversion Example**

**Centre 4800 - Calgary, AB**

74,868 sq ft | 123-Suite Hotel converted to 79 units of supportive housing

*Pre-Conversion (2017)* □

*Post-Conversion (exterior)* □

*Post-Conversion (interiors)*
