Number	<i>[To be assigned when submitted Council for approval]</i>
Date of Approval	TBD
Approval History	TBD
Next Scheduled Review	January, 2022

Statement

The City of Edmonton seeks to promote economic recovery by supporting high impact development that will create jobs and provide increased municipal revenue in the future.

The purpose of this policy is to provide timely financial support in the form of a grant to assist local developers to commence construction during the 2021 taxation year of high impact projects in the Centre City area as outlined in the City Plan. The outcome of this policy is to promote economic recovery from the impacts of the COVID-19 pandemic in Edmonton. Grants will offset any increase in taxes for four years that result from the construction or retrofit of high impact developments.

Guiding Principles

- **Timely access:** Providing timely access to a grant is key to supporting the development. The policy framework supports a swift response while ensuring appropriate levels of oversight.
- **Certainty:** Consistent support for a grant will provide certainty for developers to proceed with large construction projects knowing taxes will be frozen for four years.
- **Economic Growth:** Economic support through a grant will assist new developers to proceed with construction which will provide immediate job creation and increased municipal revenues in the future.

Criteria

- Projects must fall within the Centre City area as outlined in the City Plan.
- Projects must have a cost to construct of at least \$10 million and create 50 residential units.
- Construction must commence in the 2021 taxation year.
- Developers must provide a declaration that the project would not proceed without the grant and provide a rationale explaining those reasons.
- Additional criteria may be suggested by City Administration.
- Grant funding agreements may be required.
