Digital Imaging Remote Dx Pathway – May 2020

Edmonton Innovator Develops World-Class Technology to Drive Better Outcomes–

Edmonton, AB, May 26, 2020 – Health City is pleased to announce a collaboration between MEDO.ai, WestView Primary Care Network and Alberta Innovates to initiate a key pilot study of MEDO.ai's artificial intelligence-augmented 3D ultrasound platform.

Edmonton-based MEDO.ai, following their "Engineering of the Future" award from Falling Walls Venture 2019 in Berlin, and has been accepted into the Alberta Innovates' Accelerating Innovation into Care (AICE) – Market Access Program. AICE is a key entrepreneurial ecosystem support program that provides digital health tech companies in Alberta with the opportunity to implement their innovative solutions in a real-world setting anywhere in North America.

HMF Health City Podcast: Health City: Transforming health and driving economic development

Listen to the podcast by Reg Joseph, the CEO of Health City, as he discusses how Health City has worked with numerous stakeholders to develop new pathways of care that drive better outcomes and economic development in the health sector. He focuses on data, artificial intelligence and extended reality platforms. Health City is known for connecting industry and healthcare and focusing on innovation that can benefit both.
