

# Rezoning of 11406 – 119 Street in the Prince Rupert Neighbourhood from Medium Industrial Zone (IM) to Industrial Business Zone (IB)

Cremation is a combustion process whereby a container/casket and human remains sometimes in body bag are incinerated at a high temperature in a closed chamber.

# The City of Edmonton has a mandate for Excessive Odor and Emissions

# The Residents of Prince Rupert oppose the application to rezone this location for the following reasons:

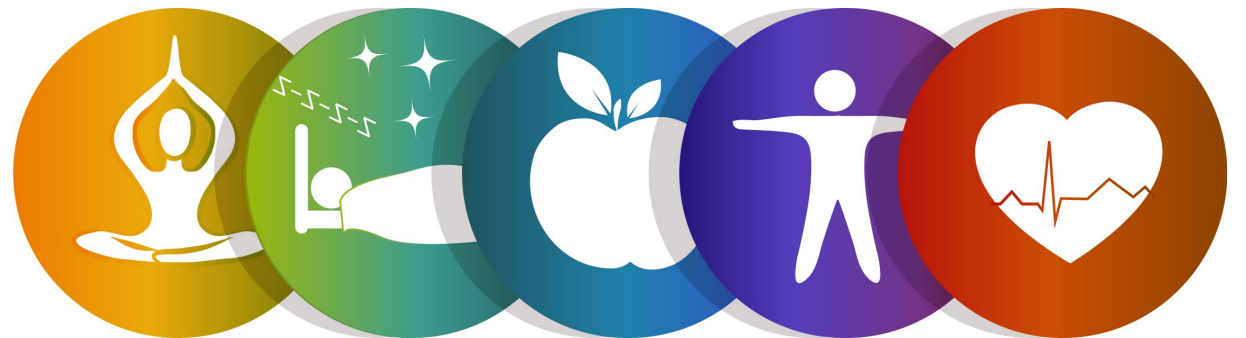

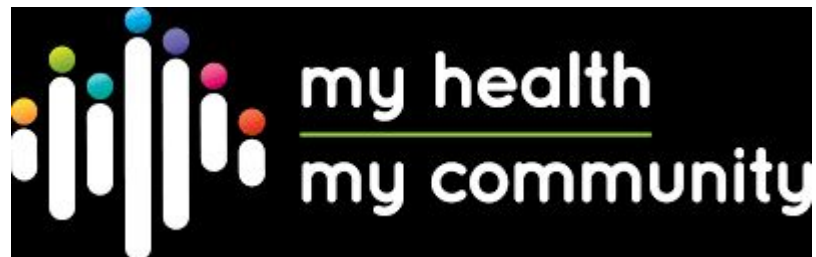

## Types of emissions

- Combustion gases
- Particulate matter and fine dust
- Organic pollutants
- Heavy metals: Mercury

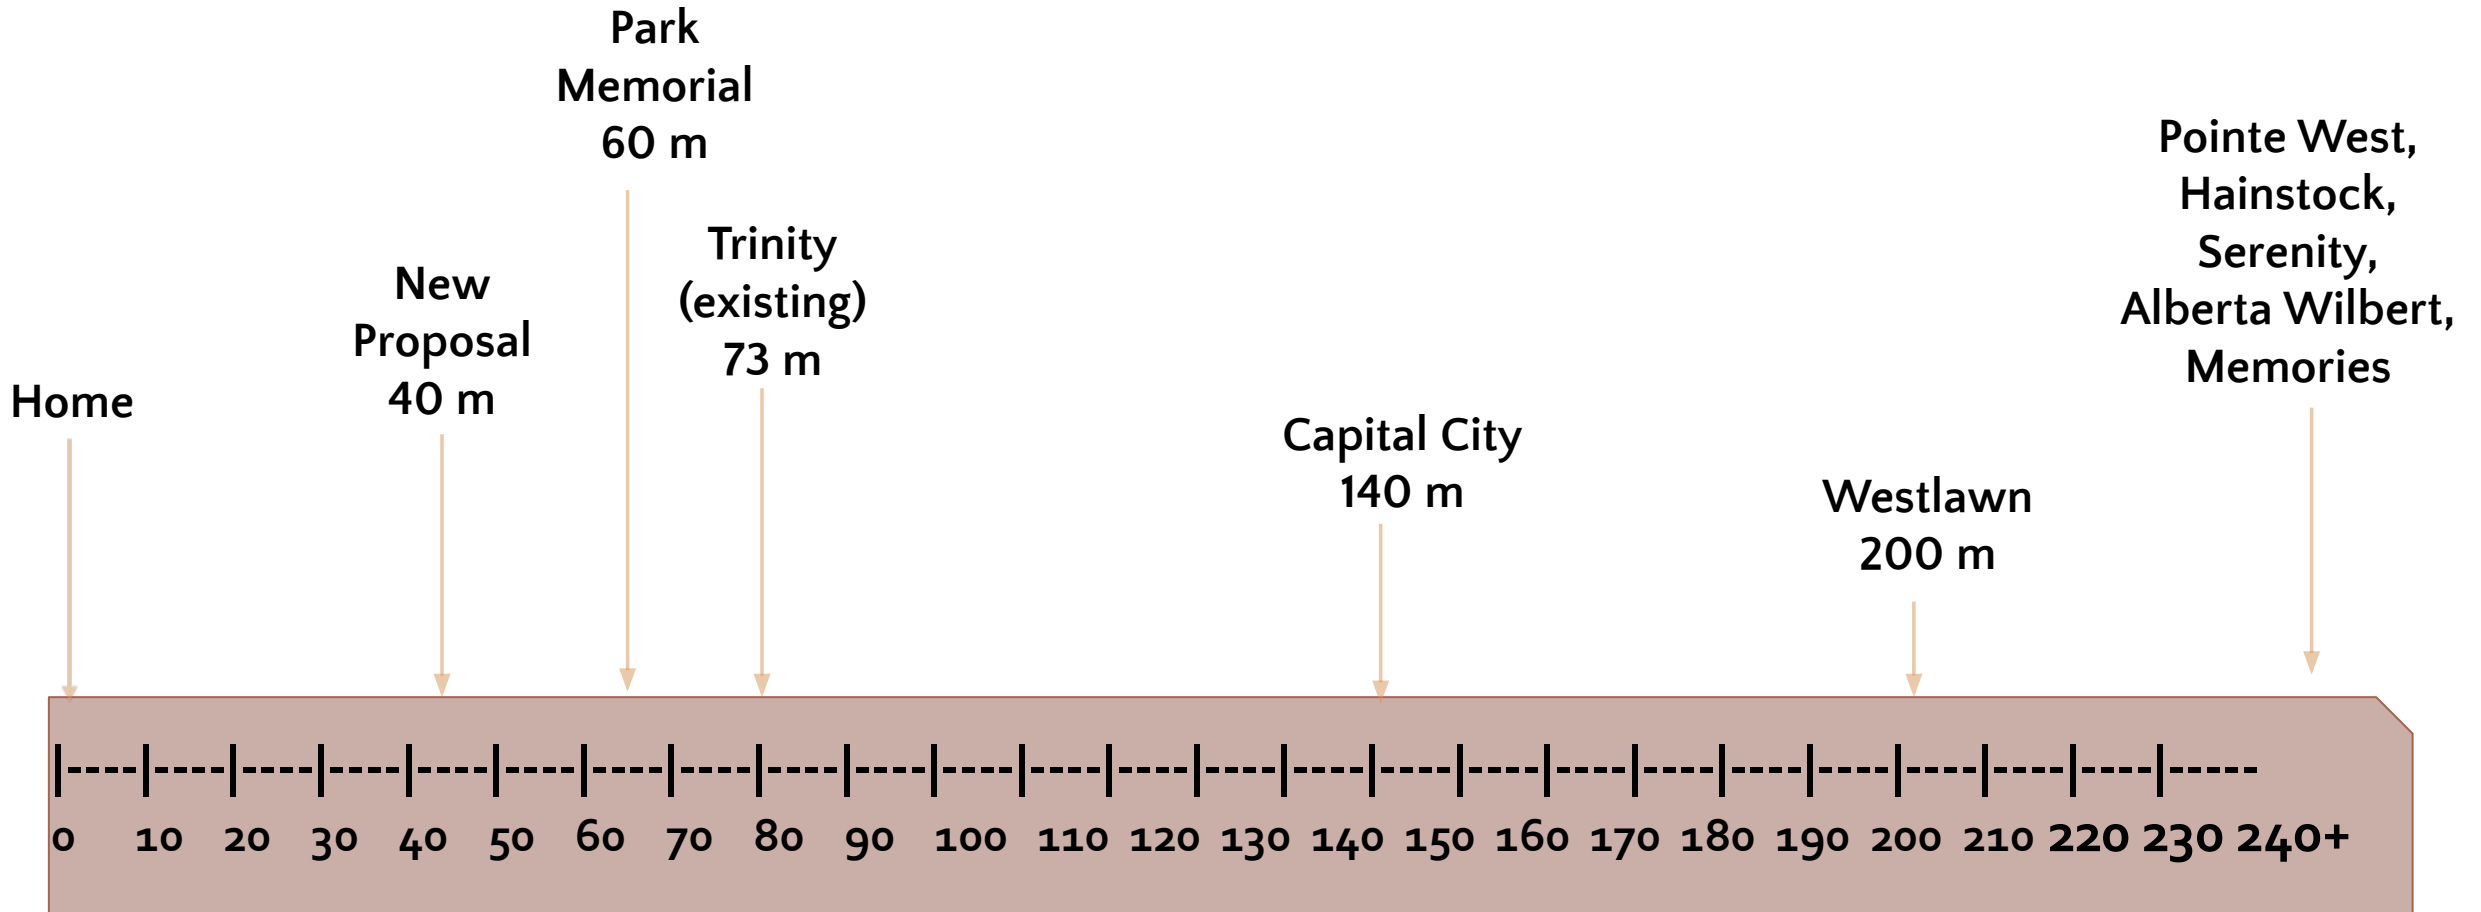

# Health impact of emissions

- Risks of heart disease, lung cancer, asthma, and adverse birth outcomes, and exacerbate other conditions such as diabetes.
- WHO and USEPA advise care should be taken to limit exposure.

# Crematorium Proximities - Edmonton

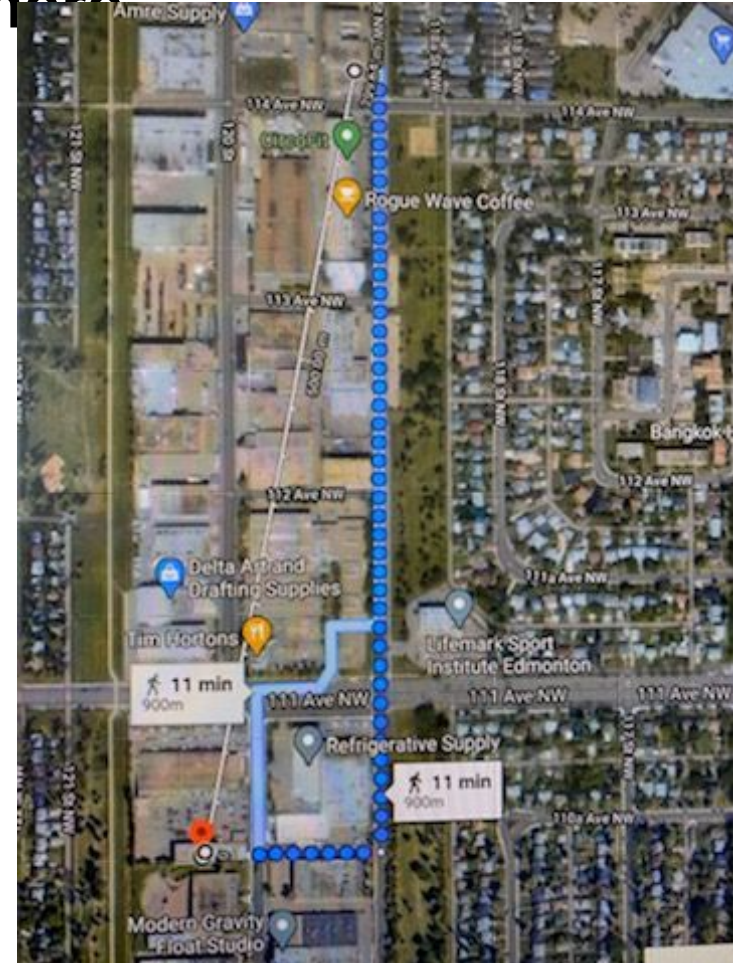

# Close proximity to residential homes

Proposed site

40 m

Crematorium 900m from here

# Smell and Odor

- Strong and persistent acrid odor.
- Smell of flesh burning
- Outdoor odor permeates inside

# Residents' right to enjoy their home and outdoor space greatly compromised

We will no longer be able to enjoy the outdoors as we today
