## By-Name List - March 2021

The By-Name List is a real-time list of all people experiencing homelessness in Edmonton. It includes a robust set of data points that support coordinated access and prioritization at a household level and an understanding of homeless inflow and outflow at a system level. Homeless counts have been conducted in Edmonton since 1999, providing a snapshot of homelessness in the community, while monitoring changes and trends in the homeless population over time. A homeless count is a collective effort to learn and to generate awareness about the scope and experience of homelessness in a community. In Edmonton, the practice of a shared By-Name List of those experiencing homelessness continues to improve our understanding of the need in real-time. The homeless count will provide additional depth and context to data available through the By Name List.
