

Work Sites in Poor Condition and with Tree Damage

The table below provides a summary of the number of sites between January 2019 and April 2021 that were left in poor condition and with some level of tree damage. Most of the times when a site is in poor condition, damage has been done to the roots of the trees. The numbers in the table below only reflect sites that were reported to or observed by the City. There are many sites that go unreported or unobserved so these numbers do not capture the full extent of damage being done to City trees.

Year	Boulevard and Open Space Trees	Natural Areas
2019	85	14
2020	58	17
2021 (YTD April 6)	21	1

The images below showcase examples of work sites in poor condition or with little to no tree protection.
